

## Castle Learning's Chrome Browser Lockdown

### What is it?

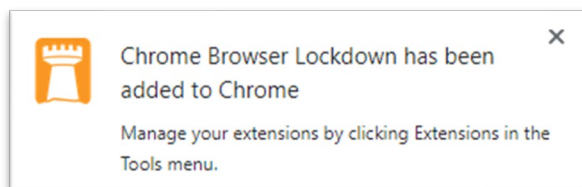

When a teacher or admin assigns an assignment or assessment in Castle Learning, they may enable an option to Enable Browser Lockdown. If they have enabled that option AND this extension is installed on the device that the student is using to complete the assignment or assessment, it will close all other tabs and will not allow the student to open a new tab or browser window.

Installing the Chrome Extension:

- ❖ Open Chrome browser
- ❖ Navigate to [chrome.google.com/webstore](https://chrome.google.com/webstore)
- ❖ Search for Castle Learning
- ❖ Click on Chrome Browser Lockdown

- ❖ Click Add to Chrome
- ❖ If a pop-up appears, click Add Extension

When “Enable Browser Lockdown” is checked, any tabs a student has open will close when they begin an assignment. They will not be able to open any new tabs or windows while completing the assignment.
